Professional Summary

Software Developer with 2.8 years of experience in K2View Fabric Development, data modelling, and microservices-based solutions. Proficient in Python, Django, REST API development, MySQL, and frontend basics (React.js, HTML, CSS). Seeking a backend-focused role to build scalable and high-performing applications.

Technical Skills

Programming: Python, JavaScript

Backend: Django, Django REST Framework (DRF)

Frontend: React.js, HTML5, CSS3

Database: MySQL

Tools: K2View Fabric, Git, Postman, VS Code, PyCharm, JIRA, Agile/Scrum

Work Experience

Software Developer – Verizon

April 2022 – February 2025 | Hyderabad

Experience: 2 years 11 months

Responsibilities:

• Developed end-to-end data solutions using K2View Fabric.

• Built Logical Units (LUs), pipelines, transformations, aggregations, and microservice-based flows.

• Designed and optimized SQL queries for high-performance data retrieval.

• Improved performance of Fabric components through debugging and query optimization.

• Collaborated with cross-functional teams following Agile methodology.

Key Achievements:

- Reduced LU execution time by 20% through optimization.
- Automated repetitive processes using Python scripts.
- Built reusable components to standardize team development.

Projects

Expense Tracker Web App (Django + MySQL)

- User authentication and expense CRUD operations.
- Date-based filtering and monthly reporting.
- Optimized ORM queries and clean UI.

Daily Sales Tracker – Craving Spot (Django + DRF)

- Tracked sales, expenses, profit with auto-calculated fields.
- Created REST API endpoints for mobile integration.
- Implemented modern UI with Tailwind CSS.

Task Manager REST API (DRF)

- CRUD operations via REST endpoints.
- Token-based authentication.

Education

B.Tech in Computer Science
Bhoj Reddy Engineering College for Women, Hyderabad
Graduated: 2021

Certifications

The Complete Python Bootcamp From Zero to Hero in Python | Django for Python Developers
